DETAILED ACTION

Allowable Subject Matter

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 recites:

"A brake member that includes a non-circular hole for coupling to a pin on the brake arm such that the brake member is swingable about the pin with a swinging center that is movable within the hole."

Claim 6 recites:

"The restricting means continually applying a force to the brake lever, and the brake lever being released from restriction when a force applied by the release member overcomes the force applied by the restricting means."

Claim 12 recites:

"The reel brake being released from restriction when a force applied by the release means overcomes the force applied by the restricting means."

These limitations, in combination with the limitation of the other claims, are neither anticipated, nor rendered obvious by any prior art of record.

The closest reference, Saito et al discloses a brake member mounted to the slide chassis that is braking the reel and releasing the reel when the corresponding operations are performed, but does not disclose the detail about the brake member and the brake arm, are not disclosed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
